PROFESSIONAL SUMMARY

Software Developer and Data Analyst with a strong foundation in Java, Python, SQL, Pandas, and Machine Learning. Built and deployed RepoDoctor — a full-stack GitHub repository analyzer using Java 21, Spring Boot, and React — demonstrating hands-on backend development and system design skills. Skilled in data cleaning, dashboard development, and exploratory analysis using real-world datasets. Seeking opportunities in software development or data analytics roles to deliver data-driven, practical solutions.

EDUCATION

Master of Computer Applications (MCA)	2025 – 2027
Bharati Vidyapeeth Institute of Management & IT, Navi Mumbai	
B.C.A. (Bachelor of Computer Applications) CGPA 7.5	2022 – 2025
Shivaji University, Kolhapur	
Higher Secondary - Science (PCMB) Percentage 58%	2021 – 2022
Maharashtra Board	
Secondary Education Percentage 81.40%	2019 – 2020
Maharashtra Board	

TECHNICAL SKILLS

Programming Languages: Java, Python, C

Data Analysis & ML: Pandas, NumPy, Linear Regression, Random Forest, Data Preprocessi

Web Technologies: HTML, CSS, Bootstrap, JavaScript

Databases: SQL, SQLite

Data Visualization: Power BI, Matplotlib

Tools & Technologies: Git, GitHub, Flask, SQL Alchemy, Spring Boot, Jupyter Notebook, Scikit-learn

PROJECTS

RepoDoctor – GitHub Repository Quality Analyzer

- Built a full-stack GitHub repository analyzer using Java 21, Spring Boot 3.5, and React 18, deployed on Vercel and Render.
- Engineered a 6-dimensional scoring engine evaluating code quality, commit hygiene, documentation, project structure, and README quality.
- Implemented parallel async file fetching using Completable Future — analyzed 15+ repositories in 4–10 seconds without cloning.
- Generated professional PDF analysis reports using OpenPDF and JFreeChart
- Live Demo: <https://repo-doctor-tau.vercel.app>
- GitHub: <https://github.com/omyadav3131/Repo-doctor>

Retail Sales Forecasting & Business Analytics

- Built an end-to-end retail sales forecasting project using Python, Pandas, NumPy, Scikit-learn, Matplotlib, and Power BI.
- Developed and compared Linear Regression and Random Forest Regressor models using an 80/20 train-test split.
- Performed data preprocessing, handling missing values, and feature engineering to improve model readiness.
- Evaluated model performance using RMSE and R^2 score for regression analysis.
- Created an interactive Power BI dashboard to analyze sales by item type, outlet type, city tier, store age, and price-sales relationship.
- GitHub: <https://github.com/omyadav3131/Retail-Sales-Forecasting>

Quiz Craft – Online Quiz & Competition Platform

- Developed a web-based quiz platform with category and difficulty-based quizzes using Flask.
- Implemented automated scoring, leaderboard, and performance tracking features.
- Designed a relational database for users, questions, quiz attempts, and competitions.
- Built an admin panel to manage questions, categories, and users.
- Technologies: Python, Flask, SQLAlchemy, SQLite, HTML, CSS, Bootstrap
- GitHub: <https://github.com/omyadav3131/QuizCraft>

WORKSHOPS /SEMINAR

Cybersecurity Seminar: Cyber threats, ethical hacking, network security, data privacy

AI & ML Seminar: Fundamentals, predictive analytics, neural networks

RPA Workshop: Automation tools, workflow optimization

CERTIFICATIONS

- **Data Analytics with Python (NPTEL)** - Indian Institute of Technology Roorke Jan–Apr (2026)
- **Universal AI Hackathon Certificate** – Universal AI University (2026)
- **Programing with C Certification** – Shree Engineering Classes (2025)
- **IBM & Design Thinking** – IBM Skills Build (2024)
- **Computer Operating Systems with Tami Sorgente** – CURSQ (2023)

ACHIEVEMENTS

Participated in Universal AI Hackathon 2026 with innovative AI solutions.

Built & deployed RepoDoctor a production-level full-stack Java Application.

Built real-world projects in Data Analytics, Full-Stack Development, and AI.
